Buy Now.Â This is a warning about this book: This book only covers general approach to programming on the Palm OS, and then four programming development environments -- Codewarrior from Metrowerks, CASL from Feras Information Technologies, Satellite Forms by Puma Technology, and Visual cBAS Pad (not sure if I have the name right as I don't have the book right in front of me). Now, if you program or plan to program in one of these four platforms, then please look into the book and review it for other people. I know that Codewarrior, Satellite Forms and CASL get good press for being good development Sams Teach Yourself, C++, 24in. Hours. 800 East 96th Street, Indianapolis, Indiana, 46240 USA. Sams Teach Yourself C++ in 24 Hours. Copyright Â© 2011 by Pearson Education, Inc. All rights reserved.Â The programs in this book were created and tested first with GCC, a free and open source set of programming tools that support C++ software development. GCC is extremely popular on Linux and available for Windows and Mac OS systems, too. GCC works in a command-line environment where you type in a command to make the C++ compiler and linker create a program.
