The subject matter of international economics and finance includes all transactions that cross national boundaries including trade in goods and services, capital and labor markets and transactions in financial assets. The chapters in these volumes are organized into six topics. The first topic starts with several chapters dealing with the 'core' theory in international economics and finance. The second topic presents with several chapters dealing with balance of payments and exchange rates and again emphasis is placed on the evolution of the various approaches. That book was his response to the crisis of the 1930s—the Great Depression—and his realization that Marshallian economics was not enough. It would lead to an interventionist approach to macroeconomic policy, managed by specialists. Friedrich Hayek, by contrast, never believed that it would be necessary, or possible, to achieve the kind of policy competence that Keynes sought (see Hayek, 1931, 1944).1. That is why the Oxford Review of Economic Policy set up a Rebuilding Macroeconomic Theory Project™. Of course, since the GFC, there have been many discussions about how to fix macro.
