Chief information officer (CIO), chief digital information officer (CDIO) or information technology (IT) director, is a job title commonly given to the most senior executive in an enterprise who works with information technology and computer systems, in order to support enterprise goals. Typically, the CIO reports directly to the chief executive officer, but may also report to the chief operating officer or chief financial officer. In military organisations, the CIO reports to the commanding officer. CIO Survival Guide is a leadership manual for the emerging role of the Chief Information Officer. This book supports and guides CIOs in acquiring or enhancing their technical skills and leadership competencies to be a full and respected member of the Executive Team. It includes exposition and practice of the skills and competencies required to be a successful CIO.

As stated above, the Chief Information Officer is the person responsible for controlling the technological resources of a company. This covers a wide swathe of responsibilities, considering how technology is so inextricably linked to business processes in the modern enterprise. The CIO may find himself managing everything from an organization’s communication systems to taking decisions on the company’s broader IT direction. It is rare to find a successful business that does not have a CIO managing technology behind the scenes. Working with SAP solutions? Check out this course to become a better SAP Solution Manager. Differences Between CIO and CTO.
