James Henry Gallup, first president of the Colorado Optometric Association, was born near Greenfield, Ohio in 1809. Details of his childhood are not available. He entered the jewelry business, operating a store in Tiffin, Ohio. His first exposure to optometry occurred in 1858 when he sold Dr. Julius King's silver bridge "clericles."

When the Civil war began, he joined Company 'E' 55th Regiment, Ohio Volunteer Infantry, a unit which first went into camp on October 17, 1861. Although Gallup began as a private, he rose in quick succession from private to first sergeant, to Sergeant Major. He was promoted to First Lieutenant on August 19, 1863, appointed Adjutant by Governor Brough on August 19, 1864, and to Captain on April 24, 1865. The 55th Ohio Volunteers were first engaged in Morefield, Ohio in early 1862. Gallup and his regiment fought an elusive and fast moving Stonewall Jackson in the Shenandoah Valley. Gallup fought at the Battle of Chancellorsville, where he was wounded and Gettysburg, where he experienced shell shock which blew out one ear drum. He marched with Sherman to the Sea and in the Grand Review in Washington at the War's close. When he was mustered out with his regiment on July 11, 1865, Gallup returned home with a shattered fortune and a shattered ear drum. He was a member of the Military Order of the Loyal Legion.

He worked briefly in Shreveport, La, after the war repairing watches, but shortly moved to Greensburg, Indiana where he started a jewelry business, married Amelia (born Jan 1849), and started a family. Remembering the "clericles," from before the War, he went to Cleveland to study optometry with Dr Julius King. Astigmatism was a new concept that Dr. King chose to ignore, so Gallup then went to Chicago to study with Dr H.M. Martin, of the Chicago Ophthalmic College, a physician who taught both optometrists and ophthalmologists. After graduation he moved to Denver.

In 1890 he worked for Hardy and Columbian, and moved into the Cathcart commissioned house at 2129 Lafayette, where he lived until 1906. In 1893 he started the Denver Optical Co. In 1901 he took over the Geneva Optical Co from his neighbor Francis Speth, and operated that business until his death from arteriosclerosis on April 23, 1918, at the age of 79. He served as the first president of the Colorado Optometric Association in 1901 when it was reorganized under the auspices of the American Association of Opticians. He was an active member of Central Presbyterian Church for twenty-five years. Funeral services were held under the auspices of the Military Order of the Loyal Legion, Chaplain John L Boyd officiating, assisted by Dr. W.H. Ray Boyle of Central Presbyterian Church.

The Gallups had a son and two daughters. George H. Gallup became a real estate developer, and died in September 1942 (he is not the James Gallup important in the founding of Presbyterian Hospital.) It was said that "Mr. Gallup had two talented
daughters, and that their talents have been directed into business channels rather than along the usual domestic, social and matrimonial walks trod by the average girl." It was arranged that Edith would be the business girl. She shared her father's interest in optometry. After graduating from East High School, she studied at Northern Illinois College, returning to become a partner in the business. She was a charter member of the prestigious Physiological Branch of the American Association of Opticians, serving as Vice President in 1907-8, and vice chancellor in 1914-16. She became one of the leading optometrists in the West and was Secretary-treasurer of the Colorado State Optical Society in 1907. She served on the Board of regents of the American Optometric Association (AOA) in 1918-19, and the Executive Council (Board of Directors) of the AOA in 1919-21. Edith's writings indicate that she was one of the first feminists. Her paper on Women as Optometrists, written in 1912, sounds like a paper written in the 1970's. "For ages she worked by man's side, losing her identity in his, and without thought of recompense. Now with the increasing complications of modern life, she finds herself hampered in her financially dependant state....She has stepped forth into a new birth, advancing towards her self-dependence and greater mental, spiritual and physical development, away from the old parasitic state of dependence and disused faculties in which it were dangerous to remain without paying the penalty." Obviously she thought the new state of independence was to be obtained by becoming an optometrist. It is interesting that in spite of Edith's feeling about the importance of women, nowhere is her mother listed as other than Mrs. James H. Gallup.

Pearl first started on a business career in 1908. She worked for three years at the Merry Optical Co in Kansas City, during which time she taught evening classes in the Needles Institute of Optometry, and took licensing examinations of neighboring states just for the fun of it. She spent some time in Greensburg, Indiana, with maternal relatives, and returned to Denver for a "rest cure." Shortly thereafter she joined her father and sister in the Geneva Optical Co. After the retirement of James Gallup, the sisters continued to operate the business, first as the Geneva Optical Co, and then as "James H. Gallups Daughters" until the late 1930's. Pearl died in about 1944 and Edith in 1967. Neither married.

J.H. Gallup was everlastingly enthusiastic. The enthusiasm was shared by daughter Edith. They made a good team, enjoying all aspects of the practice of optometry, each trying to get one up on the other. Edith thought that her father was the best optometrist west of the Mississippi, and JH thought Edith was the best on both sides of the river. They lived at 2129 Lafayette during the heyday of the neighborhood, from 1890 to 1905. Gallup stood for the advancement of optometry as a scientifically based profession. He pled, thru various optical publications, for endowment of optometry by the wealthy so that better educational and research opportunities would be available. The Gallup family was socially prominent, and made an important contribution to the development of optometry both on a local and national level.
The Geneva Optical Company

The Geneva Optical Co was founded immediately after the Civil War (1869) by Andrew L. Smith, as the A.L. Smith Optical Company, of Geneva, New York. In June 1888, realizing that the West had no wholesale optical house, Smith was joined by JT Brayton and HW Henshaw who recognized that a Chicago branch would serve as an important outlet for the products of their spectacle factory. The Geneva Optical Company of Chicago was established at 57 Washington Street, and rapidly grew in size and scope, to eclipse the original New York office. Seeing additional opportunity even further West, Smith established the Geneva Optical Co of Denver in 1890 with E Merritt Cole as President and AI Agnew as Secretary. When Smith died on December 14, 1894, Fred H Smith became president of the parent firm. Advertisements for the firm in 1904 listed branches in Chicago, Des Moines, St Louis, and Geneva, New York, but not Denver. By 1915 Chicago was listed as the main factory with branches in St Louis, Minneapolis, Des Moines, and Cincinnati, but again not Denver. The firm became Standard Optical Company and later was absorbed by Shuron Optical Co.

The Denver office was opened in 1890 by EM Cole who established his residence at the Albany Hotel. John Stevens became the manager in 1896, and Francis Speth in 1901. (Speth lived at 2141 Lafayette) Gallup took over in 1902, and with his daughters operated the firm for many years. His relationship with the Chicago office is uncertain, as it is not listed in their subsequent advertisements, and the current owners of Shuron Optical Company are unaware of any connection.

The Geneva Optical Co was imaginatively creative, inventing instruments such as the Geneva Lens Clock which is used to measure the refractive power of lenses today. The company manufactured early ophthalmoscopes and retinoscopes as well as traveling cases for optometrists, and, of course, glasses. Not only did the firm publish a catalog giving the best instructions of the day for fitting spectacles, but it also published 10,000 copies of Hartridge’s book on optometry. This established Hartridge as an authority, and helped many jewelers to make the transition to optometry. By 1901 the firm occupied 7,200 square feet at its plant at 63 Washington Street and employed 100 workers. The company was the first to establish branch offices in other cities, all supervised by optometric graduates. Ed F. Mckee established the St Louis branch, and Percy M. Smith, the Des Moins branch, and E Merritt Cole, the Denver Branch.

**Denver City Directories** Note that there is a John C Gallup (Van Law and Gallup) r 631 17th Ave (real estate and investments) listed in the 1891 directory. This is the Gallup associated with Presbyterian Hospital and is unrelated to the Gallup of Lafayette St. To complicate things further, both were prominent members of Central Presbyterian Church.

**Riverside Cemetery Records:** James H Gallup interred 11 Sep 1942, Riverside-next of kin Edith Gallup.

James H Gallup was cremated 26 April 1918, 79 years old, at Riverside-Olinger was mortuary.

**1900 US Census** see "Census Summary."

**Pioneer Optician, here 27 years, dies aged 79, Rocky Mountain News 24 April 1918**

James H Gallup, owner of the Geneva Optical Company, and a resident of Denver for twenty-seven years, died yesterday at his home, 1617 E Fourteenth Ave, where he has been confined for several months with arteriosclerosis. Mr. Gallup passed his seventy-ninth birthday March 13. He was a captain in the 55th Ohio volunteers, marched with Sherman to the sea, was wounded at Chancellorsville and suffered shell shock in the battle of Gettysburg.

For twenty-five years he was a member of Central Presbyterian Church and at one time an officer. He served several terms as president of the Colorado State Optical Association and contributed to national optical publications.

Mr. Gallup is survived by his widow, two daughters-Pearl and Edith, and by one son George.

Funeral services will be held at the Olinger Mortuary under the auspices of the Loyal Legion, Chaplain John L Boyd officiating [article contains a rotten picture]

**Social Yearbooks for Denver** Mrs. Hill's Blue Book for 1892 lists Mr. and Mrs. James C. Gallup living at 2129 Lafayette with James H. Gallup. The Social Yearbook of 1898 lists Miss Edith Gallup and Miss Pearl Gallup as living at 2129 Lafayette. The 1899 Social Yearbook lists Mr. and Mrs. J.H. Gallup living at 2129 with Miss Edith Gallup and Miss Pearl Gallup. In the 1901 to 1902 yearbook, Mr. and Mrs. James H. Gallup are living in 2129 with Mrs. G.W. Kennedy and Pearl Gallup. The Denver City Blue Book and Social Register of 1908 and 1909, which is the next available volume, published by White Stevens Publishing Company at 1824 Curtis St. does not list the Gallups.

**Osborn, Hartwell, The fifty-fifth regiment Ohio volunteer infantry-its forty-eighth annual reunion, The Firelands Pioneer, 1914**

On September 25, 1913, 86 survivors of the command assembled at the Armory in Norwalk, Ohio, there were 344 men total still alive. The total enrollment of the regiment was 1384 of which 146 were killed in action, 573 wounded, for a total of 719 hit by bullets. 79 were captured, and 422 were discharged or died of disease. 298 men of the 537 who were mustered out marched in its final parade. There is a list of the campaigns, and a note that James H Gallup has amounted to something.

Henry Fielding was an 18th century English writer and magistrate who established the mechanisms of the modern novel through such works as 'Tom Jones' and 'Amelia.' After beginning his writing career as a playwright and editor of satirical publications, Henry Fielding found his footing by penning Joseph Andrews and other parodies. Through later works such as Tom Jones, Fielding earned acclaim for helping establish the foundations of the modern novel. Early Years and Career. Henry Fielding was born on April 22, 1707, in Sharpham Park, Somerset, England. Family History. Hands on History. History for Kids. James I of England and VI of Scotland. James was king of Scotland until 1603, when he became the first Stuart king of England as well, creating the kingdom of Great Britain. James was born on 19 June 1566 in Edinburgh Castle. His mother was Mary, Queen of Scots and his father her second husband, Lord Darnley. Darnley was murdered in February 1567. In July Mary was forced to abdicate in favour of her infant son, James's tutor, the historian and poet George Buchanan, was a positive influence and James was a capable scholar. James's eldest son Henry died in 1612 and his wife Anne in 1619. James himself died on 27 March 1625 and was succeeded by his second son, Charles. a. Henry James - Henry James - Legacy: Henry James's career was one of the longest and most productive—and most influential—in American letters. A master of prose fiction from the first, he practiced it as a fertile innovator, enlarged the form, and placed upon it the stamp of a highly individual method and style. He wrote for 51 years—20 novels, 112 tales, 12 plays, several volumes of travel and criticism, and a great deal of literary journalism. His rendering of the inner life of his characters made him a forerunner of the ‘stream-of-consciousness’ movement in the 20th century. Leon Edel The Editors of Encyclopaedia Britannica. Learn More in these related Britannica articles: American literature: Henry James. James Murdoch (1844-1914) was an important architect in Denver in the late 19th and early 20th centuries. Several of his works are listed on the National Register of Historic Places. At least two of his works have been designated Denver landmarks. He was born in Scotland in 1844. He arrived in Denver in 1888. He died in 1914. John C. Gallup residence (1891), at 1763 Williams Street, Denver, since demolished. Worker housing, store, school, offices (1906) in Cokedale, Colorado, a coal mining company town, NRHP-listed as Cokedale Historic District.
