In academia and librarianship, conference proceedings are a collection of academic papers published in the context of an academic conference or workshop. Conference proceedings typically contain the contributions made by researchers at the conference. They are the written record of the work that is presented to fellow researchers. In many fields, they are published as supplements to academic journals; in some, they are considered the main dissemination route; in others they may be considered grey. The IFMBE Proceedings Book Series is an official publication of the International Federation for Medical and Biological Engineering (IFMBE). This series gathers the proceedings of various international conferences, which are SPIE Proceedings, giving access to the latest original research presented at SPIE conferences; present, publish, and promote your research with SPIE. Contact SPIE Publications. SPIE Conference Proceedings. Proceedings of SPIE offer access to the latest innovations in research and technology and are among the most cited references in patent literature. The original research papers presented at SPIE conferences are available 2 to 4 weeks after the conferences in the SPIE Digital Library.
