Exploring the Deep, Dark Sea, nonfiction rockstar Gail Gibbons invites readers along for a journey to the depths of the ocean. Without leaving home, readers will learn about the types of animals found at different sea levels. With her trademark combination of clearly-labeled diagrams, infographics, and accessible language, Gibbons explains the technology for exploration, and the many fascinating discoveries scientists have made in the darkest reaches of the ocean. Many oceanographers are trying to change that. To explore the deep sea, they climb into submersibles and employ Remotely Operated Vehicles to find out more about the ocean and ocean floor. She has been on the seventeenth floor of a skyscraper in progress, has spoken with truck drivers about the workings of their rigs, has dismantled every clock in her home, and would have donned scuba diving gear to research a sunken ship had the sea waters not been too turbulent. We love this one! Exploring the Deep, Dark Sea is fascinating and exciting and repeatedly requested by T. Not only did we both learn several new facts about the ocean, the story has translated into T’s play. (Did you know that the tripod fish searches for food in the abyss with the tips of its fins? I didn’t.)
